

Fellowship Program in Microbial Risk Assessment for Public Security, Safety and Health

Integrated Academic/Employment Opportunities at

With support from the Department of Homeland Security, Drexel and Michigan State Universities are offering a fellowship program in Microbial Risk Assessment for Public Security, Safety, and Health.

The fellowship program will integrate:

- Academic coursework resulting in a Master's degree with a graduate certificate in Microbial Risk Assessment
- Research at the Center for Advancing Microbial Risk Assessment, an Environmental Protection Agency and Department of Homeland Security Research Center of Excellence based at Michigan State University and Drexel University
- Two, 6-month professional internships at Homeland Security Science Technology Engineering Mathematics (HS-STEM) sites. Appropriate sites for completion of the internship include government agencies such as the Department of Homeland Security and Environmental Protection Agency, national laboratories, and university-based Department of Homeland Security Centers of Excellence.

Support

Support up to \$2,300/month (tuition and stipend) is available for graduate students. Four Master's Fellowships will be available at Michigan State University.

Qualifications

Fellows must be U.S. citizens. This program is open to students with backgrounds preparing them for advanced study of quantitative microbial risk assessment, such as science, engineering, mathematics, and public health. Students in M.S., Ph.D. and MPH programs are eligible to apply. Undergraduate students should be in their Junior or Senior year.

Contact Information

Fellowships are available starting fall 2008. Interested students should contact Dr. Joan Rose (phone: 517-432-4412; email: rosejo@msu.edu) for further information and for application materials. See the CAMRA website (camra.msu.edu) for more information.
